

MC10

MarkerCard (Blank) suitable for 10mm width Terminal Blocks

Markers are used to label terminal blocks. They provide clear identification, making it easier to understand the position or connection of each terminal block. Markers help in organizing and ensuring that the correct connections are made, especially in complex systems. They are essential for troubleshooting, maintenance, and safety, as they allow for quick identification of circuits and facilitate accurate wiring and documentation.

Dimensions

Colour	White
Marker Tag Width	10 mm

Technical Data

Material	Polyamide
Material Grade	V0
Type of Marker	Terminal Marker
Type of Marker Card	Blank
Marker Card / Warning Label Material	Polycarbonate
